Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) An identification system for identifying and distinguishing individual cleaning articles for cleaning a surface selected from a group consisting essentially of dishes, glassware, cooking pots and pans, kitchen counters, kitchen cabinets, kitchen sinks, dining tables and other surfaces that are used during the food preparation process, toilets, tubs, sinks, floors, walls, ~~autos~~ cars, boats, windows and ~~furniture~~ tables, each of said cleaning articles selected from the group consisting essentially of sponges, wipes, towels, rags, cloths, blotters and metallic and non-metallic scrubbers, the identification system comprising a plurality of said cleaning articles, each cleaning article intended for and corresponding to a different specific intended cleaning application, each of the cleaning articles including an external surface, a cleaning surface disposed on the external surface for a specific intended cleaning application, and identifying indicia constituting a visually distinguishing external feature for specifically identifying the specific intended cleaning application of each of the plurality of cleaning articles, the identifying indicia distinguishing each of the cleaning articles for different intended cleaning applications one from another and specifying the specific intended cleaning application of each of the plurality of cleaning articles.

2. (Original) The identification system of Claim 1 wherein the indicia comprises text affixed to the external surface of each of the plurality of cleaning articles, the text describing the specific intended cleaning application.

3. (Original) The identification system of Claim 1 wherein the indicia comprises identifiable symbols affixed to the external surface of each of the plurality of cleaning articles, the

identifiable symbols representing images descriptive of the specific intended cleaning application.

4. (Original) The identification system of Claim 1 wherein each of the plurality of cleaning articles has an outer silhouette, the indicia comprising an identifiable shape formed by the silhouette of each of the plurality of cleaning articles, the identifiable shape representing images descriptive of the specific intended cleaning application.

5. (Original) The identification system of Claim 1 wherein the indicia comprises indicia that is raised relative to the external surface for tactile identification.

6. (Currently Amended) An identification system for identifying and distinguishing individual cleaning articles for cleaning a surface selected from a group consisting essentially of dishes, glassware, cooking pots and pans, kitchen counters, kitchen cabinets, kitchen sinks, dining tables and other surfaces that are used during the food preparation process, toilets, tubs, sinks, floors, walls, ~~autos~~ cars, boats, windows and ~~furniture~~ tables, the identification system comprising a plurality of said cleaning articles, each of said cleaning articles selected from the group consisting essentially of sponges, wipes, towels, rags, cloths, blotters and metallic and non-metallic scrubbers, each of the plurality of cleaning articles being intended for and corresponding to a specific cleaning application and including an external surface, a cleaning surface disposed on the external surface of each of the plurality of cleaning articles for a specific intended cleaning location, and identifying indicia constituting a visually distinguishing feature for identifying the specific intended cleaning application of each of the plurality of cleaning articles, the indicia including a visually discernible identification associated with the cleaning article for distinguishing each of the cleaning articles for different intended cleaning applications one from another, for specifying the specific intended cleaning application of each of the plurality of cleaning articles and for expressly associating the specific intended cleaning

application of each of the plurality of cleaning articles with the specific intended cleaning application of each of the plurality of cleaning articles.

7. (Original) The identification system of Claim 6 wherein the identifying means comprises text affixed to the external surface of each of the plurality of cleaning articles, the text communicating the specific intended application of each of the plurality of cleaning articles.

8. (Original) The identification system of Claim 7 wherein each of the plurality of cleaning articles bears a different indicia representing a different and distinguishable visually discernible identification indicating a different intended cleaning application.

9. (Original) The identification system of Claim 7, wherein the indicia is permanently affixed to the cleaning article.

10. (Original) The identification system of Claim 7, wherein the indicia is an indelible and non-toxic dye of a contrasting color to that of the cleaning article.

11. (Original) The identification system of Claim 7, wherein the indicia is a visually discernible material of a contrasting color to that of the cleaning article embedded into the cleaning article to form the indicia identifying the specific intended application of each of the plurality of cleaning articles.

12. (Original) The identification system of Claim 7, wherein the indicia is formed by a lithographic, printed or stenciled process.

13. (Original) The identification system of Claim 7, wherein the indicia is formed by a raised surface relative to the external surface.

14. (Currently Amended) A method of distinguishing cleaning a surface selected from a group consisting essentially of dishes, glassware, cooking pots and pans, kitchen counters, kitchen cabinets, kitchen sinks, dining tables and other surfaces that are used during the food preparation process, toilets, tubs, sinks, floors, walls, ~~autos~~ cars, boats, windows and ~~furniture~~ tables, articles for cleaning a non-human surface, one from another, wherein each of said cleaning articles is selected from the group consisting essentially of sponges, wipes, towels, rags, cloths, blotters and metallic and non-metallic scrubbers, the method comprising the steps of providing a plurality of said cleaning articles, each intended for and corresponding to a specific intended cleaning application, selecting for each of the plurality of cleaning articles a visually discernible indicia associated with the cleaning article and with the intended cleaning application, the indicia being different from the indicia of the other of the plurality of cleaning articles intended for different intended cleaning applications so as to facilitate visual determination of the intended cleaning application and discrimination of the cleaning articles intended for different intended cleaning applications one from the other, and applying the indicia to the cleaning articles.

15. (Original) The method of Claim 14, wherein the first and second indicia are written words indicating the intended use of the first and second one of the plurality of cleaning articles, respectively.

16. (Original) The method of Claim 14, wherein the first and second indicia are symbols indicating the first and second intended use of each of the first and second one of the plurality of cleaning articles, respectively.

17. (Original) The method of Claim 14, wherein the first and second indicia are permanently affixed to each of the first and second one of the plurality of cleaning articles, respectively.
